903

Franke INOX Cream
Stainless Steel Cleaner, 250mL

Spread a little on a damp cloth, and rub in following the grain of stainless steel. Give the sink a quick rinse and it will shine like new!

\$19.99

TIP!

What does gauge and 18-8 stainless steel mean?

The lower the gauge the more resistant to denting, noise, and vibration the stainless steel is. 18-8 is the composition of the stainless steel. The higher the percentage the better the grade of stainless steel. In this case, the stainless steel is 18% chromium and 8% nickel.
