

DAFCO FILTRATION GROUP®

THROWAWAY FILTERS

- Heavy duty frame
- Available in Polyester and Fiberglass
- Wide range of standard and custom sizes
- Available in 1" and 2" thicknesses
- High velocity model available
- UL 900 Class 2

DESCRIPTION

Dafco Filtration Group Throwaway Filters are manufactured with the highest quality components. You are assured of high performance and dependability. The one-piece heavy-duty chipboard frame is thermally bonded to the media and metal grids. A double skinned progressively dense fiberglass and metal grid is used to provide product integrity. An optional 100% thermally bonded polyester media is available.

BENEFITS

The fiberglass media offers a lower pressure drop and longer service life over polyester media. Polyester media is recommended for applications that

may require an increased efficiency with minimal increase in resistance. Rugged construction gives maximum performance and reliability under normal operating conditions. An **Industrial Grade** model is available upon request for use in high velocity systems and high dust environments.

APPLICATIONS

Throwaway Filters are designed for use in residential, commercial and industrial applications where disposable panels are recommended. Safe and efficient, these filters are available in standard and custom sizes.

DAFCO FILTRATION GROUP®

SPECIFICATIONS

Throwaway Filters are available in a variety of standard and custom sizes in 1" and 2" thicknesses. Filters are designed for velocities to 300 fpm. All filters are classified by Underwriters Laboratories, Inc. as to flammability Class 2.
