## **EPOXY PUTTY- How to Use**

---

### **GENERAL INFORMATION:**

Oatey Epoxy Putty is a multi-purpose sealing, patching, and mending compound. It should be considered a temporary, as opposed to a permanent, repair job. The steel filled formula mixes easily in your hand just cut off the amount you need for the job.

### **APPLICATION:**

All surfaces must be as dry and clean as possible. Remove Oatey Epoxy Putty from the protective plastic tube. Cut off the desired amount with a sharp knife. Knead the putty in your hand until it turns a uniform color (light gray). Apply mixture to the surface with hand or putty knife. Smooth surface of putty before it hardens.

### **CAUTIONS AND RESTRICTIONS:**

Adhesion of Oatey Epoxy Putty is only fair to poor on wet surfaces. Permanent repairs should be considered as soon as possible. This product can be irritating to skin, eyes and respiratory system. See Material Safety Data Sheet for complete details.
