

Keep It Clean

Aquaflush Rebuild Kit

Aquaflush Diaphragm Replacement Kit

The problem with black rubber diaphragms is they just don't hold up. Today's water systems contain higher amounts of chlorine and chloramines than ever before and these chemicals deteriorate black diaphragms at an astonishing rate.

The answer to failing diaphragms is the Zurn family of chemical and clog resistant diaphragms and rebuild kits. Zurn **GO BLUE** diaphragms are made of chemical resistant TPE material that resist the chemical infiltration that cut short the life of black diaphragms. In fact, the Zurn **GO BLUE** diaphragms resist chemical deterioration 8 to 10 times better than black rubber diaphragms.

So if you are tired of failing diaphragms and dirty hands, switch to **GO BLUE** diaphragms and rebuild kits by Zurn.

- **Chemical Resistant**
- **Resists Deterioration 8 to 10 Times Better Than Black Diaphragms**
- **Clog Resistant**
- **Enhanced Performance**
- **Available as Repair Kits and Rebuild Kits**
- **Interchanges With Existing Zurn® and Sloan® Flush Valves**
