

## SLE-2 Decorative Thermoplastic Emergency Light Series

**Approvals:**  
CSA Certified to  
C22.2 #141

### Description

The Stanpro SLE-2 series is a slim line decorative emergency light which will fit well in any commercial application. The SLE-2 comes with two wedge base, integral lamps which will provide uniform lighting in the event of a power outage. Contact factory for optional lamps. The housing and lenses are made of impact, heat and scratch resistant, UV stabilized thermoplastic. Mounting is made easy with the universal mounting plate in the back, and conduit knockouts on the sides of the unit.

### Features

The SLE-2 unit is a completely self-contained emergency light which is made for use on 120 or 347 volt circuits. A 6V maintenance free, sealed lead acid battery is included with the SLE-2, which will provide 30 watts for 30 minutes of emergency lighting. The universal mounting plate is made to fit over a standard octagon box for simple, low cost installation. Once the plate is pre-mounted and all wiring connections terminated, the unit is snapped onto the plate, completing installation. White finish is standard.

### Circuitry

The Stanpro SLE-2 emergency lighting units come complete with high quality, pulse action chargers which are up to 70% more efficient than constant voltage chargers. The chargers are solid state and are complete with low voltage disconnect, brownout, and short circuit protections. A LED display indicates AC-ON status and all chargers are complete with a quick test, push-button switch for easy maintenance and testing. Recharge time is 24 hours.

### Warranty

As always, Stanpro is Focused on Quality. For complete warranty details, please see our terms and conditions.
