INSTRUCTIONS FOR INSTALLING DOOR SEAL INTO TUB

1. Remove old seal from channel around tub and make sure channel is clean.
2. Check the new seal. The seal has a front and a back side with the back having a marking strip about in the center

3. Find the center of the seal then start at the strike in the center top of the tub. Pressing the seal into the channel just enough to hold it in place as you would a button. See Figure 1

Figure 1

4. With the seal hanging from the center now go to the bottom of the tub, on either side, where the seal channel comes to the bottom is a molded square box in the tub bottom, the seal must fill this box. See Figure 2. The seal will make a right angle bend to go up the channel. See Figure 3

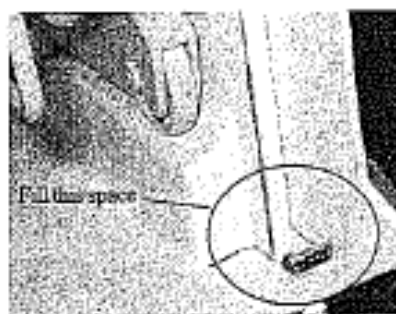

Figure 2

Figure 3

5. Form seal into channel to the center top by again tacking in place about 5 places again like pressing a button. **DO NOT PRESS THE SEAL IN ALL THE WAY UP TO THE TOP.**
6. Repeat steps 4&5 for the second side.
7. With seal tacked into channel now close the door for the door to finish pressing seal into channel.
