All other aerosol paints require the user to do retouching within one hour...or wait up to three days! If you ignore the "touch-up window," the paint can wrinkle, lift, and end up looking like an alligator. Krylon® Industrial Interior/Exterior Paint has the exclusive Touch-Up Anytime feature, so even inexperienced painters can get great results...every time...without the wait!

For Interior/Exterior Use On: Any metal or wood surface, including motors, tools, pipelines, conduit, ducts, drums, cabinets, furniture, and for color coding steel and lumber.

No Runs, No Drips, No Errors!™

PHYSICAL PROPERTIES

	INT/EXT (5-BALL)	PRIMER
PRODUCT TYPE:	Acrylic Lacquer	Alkyd
FINISH:	High Gloss	Flat
NET WEIGHT:	12 oz.	12 oz.
CASE PACK:	6	6
DRYING TIMES @ 70°F @ 50% R.H.:		
TO TOUCH:	12 minutes	12 minutes
TO HANDLE:	30 minutes	1 hour
MAX HARDNESS:	30 minutes	30 minutes (sandability)
COVERAGE:	15 – 20 sq. ft.	15 – 20 sq. ft.
RECOAT:	Anytime	Anytime
TEMP RESISTANCE:	<150°F	Up to 300°F
PRIMER:	Recommended	N/A
GAS & OIL RESISTANCE:		
	Film softens after 15 minutes	Stains
CLEAN-UP:		
WET:	Lacquer Thinner	Mineral Spirits
DRY:	Lacquer Thinner	Lacquer Thinner
SHELF LIFE:	3 years from date of manufacture	

SURFACE PREPARATION

WARNING! If you scrape, sand or remove old paint, you may release lead dust. LEAD IS TOXIC. Contact the National Lead Information Hotline at 1-800-424-LEAD or log on to www.epa.gov/lead.

Remove visible rust on metal with a wire brush, sandpaper or scraper. Sand metal, wood or plastic with #220 grit sandpaper. Clean to remove grease, oil and dirt. Allow to dry thoroughly, then wipe with a tack cloth. Use a primer on new wood and on new or rusted metal to smooth uneven surfaces, or when dramatically changing color. For best results, use with Krylon Industrial White (K01315), Gray (K01318) or Ruddy Brown (K01317) Primers. Allow primer to dry for at least 30 minutes before lightly sanding and topcoating with Krylon Industrial Interior/Exterior paints.

APPLICATION

Surface preparation must be completed as indicated. Remove cap by following instructions on the top. Test spray on an inconspicuous area for substrate compatibility. Spray 10" to 12" from surface in a sweeping motion. Apply several thin coats. Do not apply in one continuous spray. Release the spray button after each pass. When finished, clean valve by holding can upside down and spraying until only clear gas is released. If spray valve becomes clogged, pull spray button off and clean it in lacquer thinner. DO NOT stick pins or wire into can opening. Replace spray button with valve opening pointing away from body. Replace cap for future use.
