- Solid Brass & Stainless Steel
- Slotted Design Prevents Spinning
- Adjustable No-Tip Nylon Lock Washer
- Large 9/16" Nut
- 5/16" X 2-1/4" Bolt
- One Pair

Cat. No. 42443

DIRECTIONS:

IMPORTANT: May not be suitable for flanges that are raised, modified, repaired or extended.

1. Preassemble bolts as follows. Locate "White Threadlocker" on "Stud". End closest to threadlocker indicates up position. See illustration.
2. **With threadlocker end up** thread opposite end of "Stud" into "Anchor Nut" 3 or 4 turns.
3. Position "Anchor Nut" assembly into closet flange slot as normal. Pull up on "Stud" and slide "Lock Washer" down to secure.
4. Set bowl, install bolt washer(s) and fasten. Hold back on "Stud" until brass hex nut engages "White Threadlocker". Do not over tighten.
