› AMCA Certification

PennBarry certifies that the Zephyr models shown on pages 8, 13, and 19 are licensed to bear the AMCA Seal. The ratings shown are based on tests and procedures performed in accordance with AMCA Publication 211 and AMCA Publication 311 and comply with the requirements of the AMCA Certified Ratings Program.

PennBarry certifies that the Zephyr models shown on pages 10, 11, and 12 are licensed to bear the AMCA Seal. The ratings shown are based on tests and procedures performed in accordance with AMCA Publication 211 and comply with the requirements of the AMCA Certified Ratings Program.

› UL and CSA Certification

Zephyr fans carry the UL labels, UL705, (ZACT), File # E28413 & UL507, (GPWV), File # E255450. The Z1, ZL1, & ZL2 are not UL705 certified. The Z15 is not UL507 certified.

Zephyrs are also certified by the Canadian Standard Association (File #LR13309).

PennBarry reserves the right to make changes at any time, without notice, to models, construction, specifications, options, availability, etc. This bulletin illustrates the appearance of PennBarry products at the time of publication. To view the latest updates, visit PennBarry at www.pennbarry.com.

› Zephyr Z & Z-TDA Models

The Zephyrs, model Z are quiet operating ceiling exhaust fans. Some selections are available with sound ratings below 1 sone. There are 15 models that cover a wide range of performance. The units are easily field convertible to change the discharge orientation from right angle to top discharge. They are also easily field convertible from ceiling (model Z) to inline (model Z-TDA) installations. There are multiple sizes that utilize 2 speed motors that allow these units to cover an even greater range. All motors are equipped with thermal overload protection as standard. The units utilize quick access wiring to make them easy to install. Many of the units are offered with variable speed motor control which will allow for easy balancing. All models are AMCA Air and Sound rated and UL705 and UL507 listed.

› Large Capacity Zephyr Fans

PennBarry Zephyr fan models Z14 and Z15, are designed to produce high volumes of air at low noise levels. Fans can be used for general ventilation and exhaust applications. These larger capacity fans will accommodate single or multi-room ventilation and can be installed above the ceiling. The units are AMCA Air certified and UL705 listed. The Z14 is also UL507 listed.

› Zephyrette & Zephyr Jr.

The Zephyrette ZT and Zephyr Junior ZJ1 are quiet operating low profile Zephyrs. They can be installed into very shallow ceilings where other units will not fit. A speed controller is available for both models for precise system balancing and energy conservation. The units come standard with thermally protected motors, AMCA Air rated and UL705, UL507, and CSA listed.

› Zephyr Transfan

The Transfan is a room-to-room transferfan. It has an adjustable wall sleeve for varying wall thicknesses and fits easily between wall studs or ceiling joists. It is supplied with a built in variable speed motor control. It is AMCA Air rated and UL705, UL507, and CSA listed.

› Zephyr Ceiling Fan

The Zephyr Z1 is for very low flow requirements. The unit comes with a white polymeric grille and utilizes a quiet centrifugal blower wheel. The housing is made from rugged steel and has built in mounting brackets. The exhaust connection is a 4" polymeric round duct connector that has a durable damper that eliminates backdrafts and produces no metallic clatter. The Z1 is UL507 listed for use over bathtubs and showers when connected to a GFCI protected branch circuit. The Z1 is AMCA licensed for Sound and Air performance.

› Zephyr Ceiling Fans with Light

The Zephyr Light models ZL1 and ZL2 come with a maximum of 100 watt incandescent lighting (bulb not included). The units are supplied with a totally enclosed motor that utilizes sealed bearings. The units come with a white polymeric grille that has an unbreakable light lens. They utilize quiet centrifugal blower wheels with plug in receptacles for the fan and light. The housing is made from rugged steel and has built in mounting brackets. The exhaust connection is a 4" polymeric round duct connector that has a durable damper that eliminates backdrafts and produces no metallic clatter. The models are UL507 listed for use over bathtubs and showers when connected to a GFCI protected branch circuit. The units are AMCA licensed for Sound and Air performance.

› Low Sound

For sound critical applications, the Zephyr S series delivers the lowest sound ratings. All Zephyrs feature acoustically insulated housings, custom designed blower and motor pairings, motors mounted on vibration isolators, and for all but the smallest Zephyr-Z3H, dual inlet blowers.

› High Static Pressures

When higher static pressures are encountered, the Zephyr H series fans excel. Faster RPM allow these fans to better sustain airflow as static pressure increases. This makes them well suited for inline applications.

› Housings

Housings are fabricated of galvanized steel. Acoustical insulation is used to minimize sound.

› EasyTap Speed Selection

Selected Zephyrs (Z6S/H, Z8S/H, and Z10S/H) are provided with dual speed motors designed to run at nominal speeds of 1050 and 1550 RPM. By simply changing one wire tap, a fan's speed can be switched. This ability to alter speed and air flow allows on the spot adjustments to deal with unforeseen circumstances. Systems deficiencies can be accommodated in the field quickly and without the added cost of replacing a fan.

› Motors

All units have permanently lubricated motors manufactured to PennBarry's exacting specifications. Motors feature built in overload protection and plug in disconnects.

› Grilles

Constructed of attractive molded white plastic, aerodynamically designed grilles feature an 85% free area. To make for easy removal and cleaning, the grilles are held in place with spring clips. An optional metal face grille with a white finish is available.

› Wheels

Wheels are dynamically balanced and performance matched with the motor. On models Z5H and larger, dual inlet blowers are employed to minimize sound levels.

› Quick Access Wiring

Access to the motor leads is through a panel in the side of the unit; there is no need to remove the power pack. However, if the need to remove the power pack ever arises, a quick connect plug makes the process simple and easy.

› Field Conversion

The Zephyr cabinet is designed for quick transition from right angle discharge to top discharge or into an inline configuration. Simply remove two (or four depending upon model) sheet metal screws, switch positions of the access panel and top panel, re-attach screws, and a right angle discharge becomes a top discharge fan.

There is no need to remove the power pack. The blower remains oriented in one position while the panels change places. The transformation to an inline fan is accomplished by the replacement of the grille with an access panel. Again, only two (or four) screws are involved in the process.

› Changing from Right Angle to Top Discharge

1. Remove screws.

2. Remove access panel.

3. Rotate access panel 90°.

4. Re-install screws.

› Changing from Ceiling Mount to In line Configuration

1. Discard grille and remove access panel screws.

2. Remove access panel.

3. Install optional TDA panel and four screws.

4. Re-install access panel and screws.

Introduction

Zephyr

Installation

Optional Steel Grille

When the design calls for a more architecturally appealing grille, an optional steel grille is available. It features an attractive perforated steel design with overall white finish. (Not available for Z1, ZL1 & ZL2).

Inline Conversion (TDA) Kit

Adapter panel with integral duct flange allows conversion from ceiling fan (RA/TD) to inline fan (TDA). Adapter can be installed to provide for straight through (Inline) or 90° (Right Angle Inline) application. Use of the fan in Right Angle configuration allows the fan to replace an elbow in the duct system. This eliminates the pressure loss of the elbow and simplifies the installation for the contractor.

Model	Grille		TDA Panel		
	K	L	X	Y	Z
Z3,5,6	11"	13 3/4"	10"	6"	1 5/8"

RA (Right Angle) Installation

TD (Top Discharge) Installation

TDA-RA (In-Line) Installation

TDA (In-Line) Installation

› Roof Caps

These spun aluminum, rustproof, seamless vents provide a discharge cap for flat roof mounting. Unobtrusive and furnished with integral bird screen, they are designed for simple, safe flashing directly to the roof. Mounting flanges are also available turned down as cap flashing when installation on roof curbs is desired. See the PennBarry Weathercap Bulletin for more information.

› Sloped Roof Caps

Caps are available for sloped roof applications. Minimum height model SL20 is durable and has a backdraft damper. Models WCF/WCC10, 12, 14, 20 are suitable for mounting on sloped roof 4" in 12" pitch or less.

› Wall Caps

Inconspicuous but efficient wall outlets for the Zephyr fans are provided through the use of the Wall Cap. Architectural values are not diminished by this tastefully designed accessory. When properly installed, it is both watertight and effective.

Introduction

Zephyr

Accessories

Ceiling Exhaust Fans

› Lek-Trol™ Speed Controllers

Lek-Trol™ Speed Controllers permit unlimited air control. They use solid state “quadrac” circuitry and insure not only complete speed range control and extra long life reliability but also a savings in the cost of electricity. Lek-Trols™ can be installed and connected within the fan casing, permitting precise system balancing.

› 277 Volt Transformer

To meet local requirements 277V transformers are available for all Zephyrs. The transformers are step-down and will step the voltage down to 120V. Shipped loose for field installation.

› Motion Sensor

For applications where automated operation of the fan is required, a motion detector can be used to turn the fan on or off. The sensor features full scanning capabilities and can be placed anywhere within the room. The sensor also offers adjustable shutoff feature with delays of up to 15 minutes.

› Pilot Light

This amber colored light easily snaps into any opening in the Zephyr grille. The light will indicate when the fan is in operation and is ideal when fan is not interlocked with lights.

› Two Speed Switch

A PennBarry Exclusive. The decorator, three position center off, two speed switch is designed to work with PennBarry's EasyTap Dual Speed Motors (models Z6S/H, Z8S/H & Z10S/H). Adjust from low (S) to high (H) with the flick of a switch. Manually adjust for changes in room and static pressure conditions.

› Brick Vents

Sized to replace multiples of standard size brick or concrete block. Made of extruded aluminum with insect screens, storm proof features and a protective finish, they are superior vents and ideal for installation in masonry walls.

› Vibration Hanger

Hanger vibration eliminators feature rubber-in-shear type and are available for use with all units.

AVAILABLE WITH MODELS
Z14 & Z15

AVAILABLE WITH MODELS
Z3 - Z12

› Ceiling Radiation Damper

For areas where local codes require fire dampers for compliance with National Fire Protection Standard 90A, PennBarry offers a UL approved damper. The dampers are rated for 3 hours and are activated at 165°F. Compact in design, the dampers add only 7" in height when mounted between the fan and the grille. Static pressure created by the damper is negligible.

› Static Pressure Drop Chart for Accessories

› Square to Round Transition

Designed to make the installation of flex duct quick and easy. Available to accommodate the most common flex duct sizes.

Duct Transition	Part No.	Units	Round Dia.
ZT, ZJ1, Z3, Z5, Z6	56337-0	3 1/4" x 10"	6"

1. Speed (RPM) shown is nominal. Performance is based on actual speed of test. 2. Performance shown is for installation type D - Ducted inlet, Ducted outlet. Performance ratings do not include the effects of appurtenances in the airstream. 3. The sound ratings shown are loudness values in fan sones at 5ft. (1.5m) from the test inlet duct in a hemispherical free field calculated per AMCA Standard 301. Values shown are for installations Type D: ducted inlet ducted outlet. Ratings do not include the effect of duct end correction. 4. Specify discharge configuration. Standard types are RA, TD, TDA and TDA-RA. 5. Z6S and Z6H is the same unit shipped with EASYTAP dual speed motor. Wired on S (low) speed. 6. Z8S and Z8H is the same unit shipped with EASYTAP dual speed motor. Wired on S (low) speed. 7. Z10S and Z10H is the same unit shipped with EASYTAP dual speed motor. Wired on S (low) speed.

› Zephyr (Z3 - Z15)

Direct drive ceiling and cabinet fan shall be Zephyr Z, manufactured by PennBarry, Richardson, Texas 75081.

Fan housings shall be acoustically insulated, galvanized steel, and include integral backdraft damper (except Z1, ZL1, ZL2) which shall be chatter proof. Grille face shall be of aerodynamic white egg crate design and provide 85% free area. Fans shall be provided with cord, plug, and receptacle inside the housing. Entire fan, motor and wheel assembly shall be removable. Fans shall be available with TDA panel (except Z1, ZL1, ZL2) for inline orientation. Units shall be field convertible from right angle to top discharge. Fans shall have forward curved centrifugal wheel(s). Fan motors shall be multi-speed (for applicable models), positively cooled, have thermal overload protection, be suitably grounded, and mounted on vibration isolators.

Each fan shall bear the AMCA Licensed Rating Seal for Air and Sound Performance (Z) or Air Performance (Z14/15), and shall be UL Listed for UL705 and UL507, and shall be CSA Listed. The Z15 is not UL507 certified.

› Zephyrette & Zephyr Jr.

All ceiling and/or wall mounted fans indicated on the plans and schedule shall be Zephyr Jr., or Zephyrette models by PennBarry, 1401 North Plano Road, Richardson, TX 75081.

Air deliveries and maximum sone levels shall be as indicated on the plans. Fans shall be listed with Underwriters Laboratories. Fans shall feature true steel centrifugal wheels and the galvanized steel fan casing shall incorporate an integral backdraft damper. Motor speed shall not exceed listed RPM. Grille shall be of white egg-crate shape design, comply with OSHA requirements and provide 85% free open area. Terminal box shall be provided with cord, plug and receptacle. Entire fan, motor and wheel assembly shall be removable without disturbing the housing.

Each fan shall be UL705 and UL507 Listed and CSA Listed.

› Zephyr Transfan

Direct drive axial room-to-room fan shall be Transfan TF, manufactured by PennBarry, Richardson, Texas 75081.

Fan housing shall be galvanized steel and shall include an adjustable sleeve to accommodate various wall thicknesses. Two-faced grilles shall be of aerodynamic white egg crate design and provide 85% free area. Entire fan, motor and propeller assembly shall be removable. Propellers shall be die formed aluminum. Fan motor shall be permanently lubricated, positively cooled, & have thermal overload protection. Fans shall be provided with cord, plug, speed controller and receptacle factory installed inside the housing.

Each fan shall bear the AMCA Licensed Ratings Seal for Air Performance, & shall be UL705 and UL507 and CSA Listed.

› Zephyr Z1, ZL1, & ZL2

Direct drive ceiling and cabinet fan shall be Zephyr, Z1 or Zephyr Light, ZL and supplied by PennBarry, Richardson, Texas 75081.

Fan housings shall be painted steel and include integral backdraft damper which shall be chatter proof. Face grille shall be of aerodynamic design and include an unbreakable lens for use with a 100 watt (max) bulb (except Z1). Fans shall be provided with cord, plug and receptacle inside the housing. Entire fan, motor and wheel assembly shall be removable. Fans shall have a forward curved centrifugal wheel. Fan motors shall be positively cooled, have thermal overload protection, be suitably grounded and mounted on vibration isolators.

Each fan shall bear the AMCA Licensed Rating Seal for Air and Sound Performance and shall be UL507 and CSA Listed.

Zephyr

1-Year Limited Manufacturer Warranty

› Products Covered

PennBarry Fans and Ventilators (each, a “PennBarry Product”)

› One Year Limited Warranty For PennBarry Products

PennBarry warrants to the original commercial purchaser that the PennBarry Products will be free from defects in material and workmanship for a period of one (1) year from the date of shipment.

› Exclusive Remedy

PennBarry will, at its option, repair or replace (without removal or installation) the affected components of any defective PennBarry Product; repair or replace (without removal or installation) the entire defective PennBarry Product; or refund the invoice price of the PennBarry Product. In all cases, a reasonable time period must be allowed for warranty repairs to be completed.

› What You Must Do

In order to make a claim under these warranties:

- You must be the original commercial purchaser of the PennBarry Product.
- You must promptly notify us, within the warranty period, of any defect and provide us with any substantiation that we may reasonably request.
- The PennBarry Product must have been installed and maintained in accordance with good industry practice and any specific PennBarry recommendations.

› Exclusions

These warranties do not cover defects caused by:

- Improper design or operation of the system into which the PennBarry Product is incorporated.
- Improper installation.
- Accident, abuse or misuse.
- Unreasonable use (including any use for non-commercial purposes, failure to provide reasonable and necessary maintenance as specified by PennBarry, misapplication and operation in excess of stated performance characteristics).
- Components not manufactured by PennBarry.

› Limitations

- In all cases, PennBarry reserves the right to fully satisfy its obligations under the Limited Warranties by refunding the invoice price of the defective PennBarry Product (or, if the PennBarry Product has been discontinued, of the most nearly comparable current product).
- PennBarry reserves the right to furnish a substitute or replacement component or product in the event a PennBarry Product or any component of the product is discontinued or otherwise unavailable.
- PennBarry's only obligation with respect to components not manufactured by PennBarry shall be to pass through the warranty made by the manufacturer of the defective component.

› General

The foregoing warranties are exclusive and in lieu of all other warranties except that of title, whether written, oral or implied, in fact or in law (including any warranty of merchantability or fitness for a particular purpose).

PennBarry hereby disclaims any liability for special, punitive, indirect, incidental or consequential damages, including without limitation lost profits or revenues, loss of use of equipment, cost of capital, cost of substitute products, facilities or services, downtime, shutdown or slowdown costs.

The remedies of the original commercial purchaser set forth herein are exclusive and the liability of PennBarry with respect to the PennBarry Products, whether in contract, tort, warranty, strict liability or other legal theory shall not exceed the invoice price charged by PennBarry to its customer for the affected PennBarry Product at the time the claim is made.

Inquiries regarding these warranties should be sent to: PennBarry, 1401 North Plano Road, Richardson, TX 75081
