

## Typical Electrical Ratings

### 36T Series Electrical Ratings

| VAC                           | Resistive<br>(Non-Inductive) | Motor Rating<br>(Inductive) |              | Pilot<br>Duty |
|-------------------------------|------------------------------|-----------------------------|--------------|---------------|
|                               |                              | Full Load                   | Locked Rotor |               |
| 120                           | 15A                          | 3A                          | 12A          | 125 VA        |
| 240                           | 10A                          | 1.5A                        | 6A           | 125 VA        |
| 350°F Max Ambient Temperature |                              |                             |              |               |

### 60T Series Electrical Ratings

| VAC                           | Resistive<br>(Non-Inductive) | Motor Rating<br>(Inductive) |              | Pilot<br>Duty |
|-------------------------------|------------------------------|-----------------------------|--------------|---------------|
|                               |                              | Full Load                   | Locked Rotor |               |
| 120                           | 25A                          | 14A                         | 72A          | 125 VA        |
| 240                           | 25A                          | 10A                         | 60A          | 125 VA        |
| 350°F Max Ambient Temperature |                              |                             |              |               |
