**WATER Filter Status Light**

The water filter status light will help you know when to change your water filter. When the water filter status display changes from "GOOD" to "ORDER," this tells you that it is almost time to change water filter cartridge. Replace the water filter cartridge when the water filter status display changes to "REPLACE." If water flow to your water dispenser or ice maker decrease noticeably, change the filter sooner. The filter should be replaced at least every 6 months depending on your water quality and usage. To change the filter, see "Changing the Water Filter."

INDICATOR:	STATUS
GOOD(green)	New Filter installed
ORDER(yellow)	Order Filter
REPLACE(red)	Replace Water Filter
CR (when water flow decreases)	Cartridge Replaced

After changing the water filter, reset the status light by pressing and holding the FILTER button for 3 seconds. This status light will change from Replace(red)to GOOD(Green) when the system is reset.
