GeneralAire® Water Savor™

Reduce Water Waste by 50% to 98%
Install With New or Existing Humidifier
Fits Any Bypass, Flow Through Model
6 Settings to Customize for Maximum Water Savings
Easy to Install!

Water Facts

- While the earth's population continues to grow at record rates, the overall amount of water on the earth has not changed for over 2 billion years.¹ Clearly, water is not a limitless resource; yet the demand for water steadily grows.
- Less than 1% of the earth's water can be used as a drinking source.²
- Conserving water is not only essential to our wellbeing, but also has financial benefits.
- Water rates have risen 25% in 30 major cities of the USA since 2010.³ Rates in Canada rose 58% over a 5-year period ending in 2007⁴; a trend that continues.
- Installing the WaterSavor™ is a great way to reduce water waste and save money, *without* changing your lifestyle or comfort!

Innovation at It's Finest

- Your new WaterSavor™ automatically powers on when there is a call for humidity, limiting the amount of water delivered to the Vapor Pad®. The Vapor Pad® is still adequately moistened to provide humidity, yet less water goes through the pad to be released down the drain.

Six settings allow you to adjust the controls for maximum water savings without affecting humidifier output. Tested humidifiers using the Water Savor™ resulted in a minimum of 50% reduction of water draining from the humidifier, and up to 96% with customized settings!

Do you have a bypass, flow through humidifier? No matter the humidifier brand, the WaterSavor™ will work to reduce water waste, save you money and preserve the environment. Install the GeneralAire® WaterSavor™ today and *Breathe Healthier*.

Connect Your WaterSavor™ in Minutes!

Possible Water Savings With WaterSavor™

Water Released Without WaterSavor™	Water Released With WaterSavor™
39,400 Liters	2,100 Liters
Savings = 37,300 Liters!	

= 1,000 liters of water

* Results are based on 20 minutes per hour @ a 5-month heating season

* Results vary greatly based on: humidifier model, humidification demand, humidification season duration and more.
