

INSTRUCTION SHEET

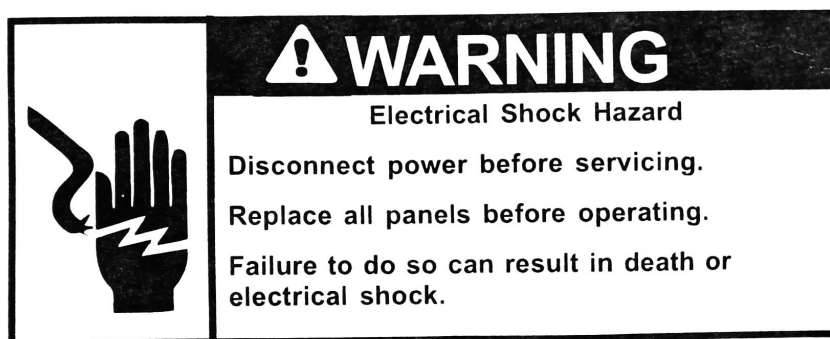

for

Service Adaptive Defrost Controls

Included with this service adaptive defrost control is a wiring harness. If the model being repaired used production part number 2154674 or 2154985 (refer to old component or repair parts list) this harness **MUST** be used for these applications. If the production part being replaced was not one of the production numbers mentioned before **DISCARD** the wiring harness.

Follow these instructions for installation of the wiring harness if required:

1. Unplug the refrigerator or disconnect power.

2. Attach the square connector on the harness to the White and Brown tabs on the adaptive defrost control supplied.
3. Install the adaptive defrost control onto the control box as normal.
4. Connect the rectangle end of the supplied harness to the control box harnesses two pin connector.
5. Plug in refrigerator or reconnect power.
