

New Lennox Direct Replacement Furnace Kits

50M56U-801 and 50D50-801 Cover More Single Stage Applications

July 19, 2016

Bulletin #16-07

Contractors can now service additional Lennox / Allied Air single stage furnaces with two new kits from White-Rodgers. Complementing the existing 21D83M-843 / 50A66-743 kits for 80V HSI systems, you can now one-source furnace controls for most 120V HSI and Spark ignition applications.

Kits come with everything needed for a fast and accurate change out. Restores furnace equipment to original factory performance.

50M56U-801 services most current Lennox / Allied Air Enterprises single stage furnaces with 2 or 3 speed PSC motors and 120V HSI. Kit includes wiring harnesses, control with Fault Recall and LED display, and dipswitches to set blower delays. Replaces Lennox **81W03**, **56W19**, **94W83**, and **74W03** service platforms – which have no other competitive replacements.
