Element insert for DC97-14486A

1. DISCONNECT ALL POWER FROM APPLIANCE before beginning replacement of element.
2. Remove defective element from the element housing.
3. Install the new element in the housing, making sure to bend the terminal tabs to lock the terminals in place after inserting them through the ceramic block.
4. Check to make sure heating element coils are in place on both sides of the element and not touching metal plate or housing.
5. Check or replace all thermostats and fuses on the element for proper operation.
6. Re-install housing into dryer and reconnect all wiring.
