

Material Safety Data Sheet

Sentec Summer Notes Aerosol Odor Eliminator

1. Product and company identification

Product name	: Sentec Summer Notes Aerosol Odor Eliminator
Supplier	: Betco Corporation 1001 Brown Avenue Toledo, OH 43607 www.betco.com 888-462-3826
Synonym	: Not available.
Trade name	: Not available.
Material uses	: Not available.
Manufacturer	: Betco Corporation 1001 Brown Avenue Toledo, Ohio 43607 www.betco.com 888-462-3826
Code	: 4215
MSDS #	: 4215
Validation date	: 4/20/2015.
Print date	: 4/20/2015.
In case of emergency	: Chemtrec (800) 424-9300
Product type	: Liquid.

Hazards identification

Emergency overview		
Physical state	Liquid.	
Color	Clear.	
Odor	Pleasant.	
Signal word	DANGER!	
Hazard statements	EXTREMELY FLAMMABLE LIQUID AND VAPOR. FLAMMABLE. VAPOR MAY CAUSE FLASH FIRE. CONTAINS MATERIAL THAT MAY CAUSE TARGET ORG/ DAMAGE, BASED ON ANIMAL DATA.	٩N
Precautionary measures	Do not breathe vapor or mist. Use only with adequate ventilation. Do not eat, drink smoke when using this product. Keep away from heat, sparks and flame. Keep container tightly closed. Wash thoroughly after handling.	or
Routes of entry	Dermal contact. Eye contact. Inhalation.	
Potential acute health effec		
Inhalation	No known significant effects or critical hazards.	
Ingestion	Harmful if swallowed.	
Skin	May cause skin irritation.	
Eyes	May cause eye irritation.	
Potential chronic health eff		
Chronic effects	Contains material that may cause target organ damage, based on animal data.	
Carcinogenicity	No known significant effects or critical hazards.	
Mutagenicity	No known significant effects or critical hazards.	
Teratogenicity	No known significant effects or critical hazards.	
Developmental effects	No known significant effects or critical hazards.	
4/20/2015	4215	1

2. Hazards identification

- **Fertility effects**
- **Target organs**

: No known significant effects or critical hazards.

: Contains material which may cause damage to the following organs: lungs, heart, upper respiratory tract, skin, central nervous system (CNS).

Inhalation	: Not determined.
	: Not determined.
Ingestion	
Skin	: Not determined.
Eyes	: Not determined.
Medical conditions aggravated by over- exposure	: Pre-existing disorders involving any target organs mentioned in this MSDS as being at risk may be aggravated by over-exposure to this product.
See toxicological inform	ation (Section 11)

3. Composition/information on ingredients

Name	CAS number	%
butane	106-97-8	10 - 20
Distillates (petroleum), hydrotreated light	64742-47-8	5 - 10
propane	74-98-6	5 - 10
Solvent naphtha (petroleum), medium aliph.	64742-88-7	1 - 5

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

4. First aid measures Eye contact : Check for and remove any contact lenses. Immediately flush eyes with plenty of water for at least 15 minutes, occasionally lifting the upper and lower eyelids. Get medical attention immediately. In case of contact with eyes, rinse immediately with plenty of water. Skin contact : In case of contact, immediately flush skin with plenty of water for at least 15 minutes while removing contaminated clothing and shoes. Wash clothing before reuse. Clean shoes thoroughly before reuse. Get medical attention immediately. Move exposed person to fresh air. If not breathing, if breathing is irregular or if Inhalation respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. Loosen tight clothing such as a collar, tie, belt or waistband. Get medical attention immediately. Ingestion : Wash out mouth with water. Do not induce vomiting unless directed to do so by medical personnel. Never give anything by mouth to an unconscious person. Get medical attention immediately. : No action shall be taken involving any personal risk or without suitable training. It may **Protection of first-aiders** be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Notes to physician No specific treatment. Treat symptomatically. Contact poison treatment specialist 5 immediately if large quantities have been ingested or inhaled. 5. Fire-fighting measures

00		
Flammability of the product	: Extremely flammable liquid. In a fire or if heated, a pressure increase will occur and t container may burst, with the risk of a subsequent explosion. Runoff to sewer may create fire or explosion hazard.	the
Extinguishing media		
Suitable	: Use dry chemical, CO ₂ , water spray (fog) or foam.	
Not suitable	: Do not use water jet.	
4/00/0045	1015	2/0

Sentec Summer Notes Aerosol Odor Eliminator

5. Fire-fighting measures

Special exposure hazards	: Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool.
Hazardous thermal decomposition products	: Decomposition products may include the following materials: carbon dioxide carbon monoxide
Special protective equipment for fire-fighters	: Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.
Special remarks on fire hazards	: Not available.
Special remarks on explosion hazards	: Not available.

6. Accidental release measures

Personal precautions	 No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilled material. Shut off all ignition sources. No flares, smoking or flames in hazard area. Avoid breathing vapor or mist. Provide adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put on appropriate personal protective equipment (see Section 8).
Environmental precautions	 Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).
Methods for cleaning up	
Small spill	: Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.
Large spill	: Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilled product. Note: see Section 1 for emergency contact information and Section 13 for waste disposal.

7. Handling and storage

Handling

: Put on appropriate personal protective equipment (see Section 8). Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. Do not ingest. Avoid contact with eyes, skin and clothing. Avoid breathing vapor or mist. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Do not enter storage areas and confined spaces unless adequately ventilated. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Store and use away from heat, sparks, open flame or any other ignition source. Use explosion-proof electrical (ventilating, lighting and material handling) equipment. Use non-sparking tools. Take precautionary measures against electrostatic discharges. To avoid fire or explosion, dissipate static electricity during transfer by grounding and bonding containers and equipment before transferring material. Empty containers retain product residue and can be hazardous. Do not reuse container.

7. Handling and storage

Storage

: Do not store above the following temperature: 50°C (122°F). Store in accordance with local regulations. Store in a segregated and approved area. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Eliminate all ignition sources. Separate from oxidizing materials. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination.

8. Exposure controls/personal protection

Occupational exposure limits		TWA (8 hours)		STEL (15 mins)			Ceiling				
Ingredient	List name	ppm	mg/m³	Other	ppm	mg/m³	Other	ppm	mg/m³	Other	Notations

	ON 1/2013	1000	-	-	-	-	-	-	-	\vdash	
	QC 1/2014	1000	1800	-	-	-	-	-	-	\vdash	

[1]Absorbed through skin.

Consult local authorities for acceptable exposure limits.

Recommended monitoring procedures	: If this product contains ingredients with exposure limits, personal, workplace atmosphere or biological monitoring may be required to determine the effectiveness of the ventilation or other control measures and/or the necessity to use respiratory protective equipment. Reference should be made to appropriate monitoring standards. Reference to national guidance documents for methods for the determination of hazardous substances will also be required.
Engineering measures	: Use only with adequate ventilation. Use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits. The engineering controls also need to keep gas, vapor or dust concentrations below any lower explosive limits. Use explosion-proof ventilation equipment.
Hygiene measures	: Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.
Personal protection	
Respiratory	: Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator.

8. Exposure controls/personal protection

Hands	Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. Considering the parameters specified by the glove manufacturer, check during use that the gloves are still retaining their protective properties. It should be noted that the time to breakthrough for any glove material may be different for different glove manufacturers. In the case of mixtures, consisting of several substances, the protection time of the gloves cannot be accurately estimated.	5
Eyes	Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: safety glasses with side-shields.	
Skin	Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product. When there is a risk of ignition from static electricity, wear anti-static protective clothing For the greatest protection from static discharges, clothing should include anti-static overalls, boots and gloves.	-
Environmental exposure controls	Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.	
Other protection	Not available.	
Personal protective equipment (Pictograms)	Not available.	

9. Physical and chemical properties

3	• •	
Physical state	: Liquid.	
Flash point	: Closed cup: -104.4°C (-155.9°F)	
Burning time	: Not applicable.	
Burning rate	: Not applicable.	
Auto-ignition temperature	: Not available.	
Flammable limits	: Not available.	
Color	: Clear.	
Odor	: Pleasant.	
Taste	: Not available.	
Molecular weight	: Not applicable.	
Molecular formula	: Not applicable.	
рН	: Not available.	
Boiling/condensation point	: Not available.	
Melting/freezing point	: Not available.	
Critical temperature	: Not available.	
Relative density	: Not available.	
Vapor pressure	: Not available.	
Vapor density	: Not available.	
Volatility	: Not available.	
Odor threshold	: Not available.	
Evaporation rate	: Not available.	
SADT	: Not available.	
Viscosity	: Not available.	
lonicity (in water)	: Not available.	
4/20/2015.	4215	5/9

9. Physical and chemical properties

Dispersibility properties	: Partially dispersible in the following materials: cold water and hot water.
Solubility	: Partially soluble in the following materials: cold water and hot water.
Physical/chemical properties comments	: Not available.
Aerosol product	
Type of aerosol	: Spray
Heat of combustion	: 9.684 kJ/g

10. Stability and reactivity

-	-
Chemical stability	: The product is stable.
Conditions to avoid	: Avoid all possible sources of ignition (spark or flame). Do not pressurize, cut, weld, braze, solder, drill, grind or expose containers to heat or sources of ignition.
Incompatible materials	 Highly reactive or incompatible with the following materials: oxidizing materials
Hazardous decomposition products	: Under normal conditions of storage and use, hazardous decomposition products should not be produced.
Possibility of hazardous reactions	: Under normal conditions of storage and use, hazardous reactions will not occur.

11. Toxicological information

Acute toxicity

	Result		Species	Dose		Exposure
butane	LC50 Inhalation Vapor		Rat	65800	0 mg/m³	4 hours
Conclusion/Summary Chronic toxicity Not available.	: Not available.					
Conclusion/Summary rritation/Corrosion Not available.	: Not available.					
Conclusion/Summary Sensitizer Not available.	: Not available.					
Conclusion/Summary Carcinogenicity Not available.	: Not available.					
Conclusion/Summary <u>Classification</u>	: Not available.					
Product/ingredient name	ACGIH	IARC	EPA	NIOSH	NTP	OSHA

11. Toxicological information

Not available.

Conclusion/Summary	: Not available.
Reproductive toxicity	
Not available.	
Conclusion/Summary	: Not available.

Synergistic products	: Not available.

12. Ecological information

Ecotoxicity : No known significant effects or critical hazards. Aquatic ecotoxicity **Product/ingredient name** Result **Species Exposure** Distillates (petroleum), Acute LC50 2200 µg/l Fresh water Fish - Lepomis macrochirus 4 days hydrotreated light **Conclusion/Summary** : Not available. Persistence/degradability Not available. **Conclusion/Summary** : Not available. Partition coefficient: n-: Not available. octanol/water **Bioconcentration factor** : Not available. : Not available. Mobility Toxicity of the products of : Not available. biodegradation Other adverse effects : No known significant effects or critical hazards.

13. Disposal considerations

: The generation of waste should be avoided or minimized wherever possible. Disposal Waste disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Vapor from product residues may create a highly flammable or explosive atmosphere inside the container. Do not cut, weld or grind used containers unless they have been cleaned thoroughly internally. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. : Not available. Waste stream **RCRA** classification : Not available.

Disposal should be in accordance with applicable regional, national and local laws and regulations.

Refer to Section 7: HANDLING AND STORAGE and Section 8: EXPOSURE CONTROLS/PERSONAL PROTECTION for additional handling information and protection of employees.
