Green Drain™

waterless trap
for floor drains

Bad Odors and Flies in your Kitchen? Green Drain™ Can prevent these issues in a safe easy way without the use of chemicals or pesticides!

Green Drain, Inc. manufactures an economical Drain Trap Seal Device that allows water to flow down the drain while preventing Pests, Odors, or Harmful Gases/ Pathogens from infiltrating the living or work space.

Four different models of the green drain available, made to fit 2", 3", 3.5" and 4" drain pipes. Simply put, the Green Drain™ is the heavy-duty solution for floor drains that so many businesses and organizations desperately need. Plumbers, distributors and retailers all are in agreement on its quality and its position as the leader in its class.

Traditional cleaning chemicals for bathrooms and plumbing systems are either extremely acidic or basic in nature. These products are usually used in high concentrations and can cause severe burns to the eyes, nose, throat and lungs. Most of these products consist of either potassium hydroxide or acids such as sulfuric acid, citric acid, hydrochloric acid or concentrated chlorine bleach. Over time all of these chemical cleaning products are destructive to plumbing fixtures and piping systems. Most importantly, the toxicity of these chemicals attacks the environment.

Simple & Effective

Installation is simple!
Remove the current drain cover.

Slide the correct size Green Drain™
2", 3", 3.5" or 4" into the opening
check the skirt is free from obstruction
and reinstall the cover.
