Ballasts test are performed with a specific manufacturing date code. Older ballasts, with the same model numbers may have different electronic designs and consequently compatibility may vary. Similarly, newer ballast, with the same model number, may have undergone revisions that may affect compatibility. Compatibility may also extend beyond this list and Stanpro recommends testing a few fixtures with the ballast compatible lamps, even if the ballast is on this compatibility list, to ensure compatibility and performance.

Ballasts test are performed with a specific manufacturing date code. Older ballasts, with the same model numbers may have different electronic designs and consequently compatibility may vary. Similarly, newer ballast, with the same model number, may have undergone revisions that may affect compatibility. Compatibility may also extend beyond this list and Stanpro recommends testing a few fixtures with the ballast compatible lamps, even if the ballast is on this compatibility list, to ensure compatibility and performance.

■ compatible
 ■ non-compatible
 N/A

To validate compatibility with ballasts that are not on this list, please contact your sales representative
