# FANBOS

**This economic, high volume low speed fan design is ideal for circulating air in Industrial and Commercial Applications and can help save energy year round.**

The FANBOS blankets a very large area by constantly moving air to create an expansive comfort zone. As a result, the big ceiling fan can create an evaporative cooling effect of three to four degrees throughout the facility.

During the heating season, The FANBOS can destratify uneven temperatures that can be in excess of fifteen degrees from ceiling to floor. This results in significant energy savings since the heating system cycles less frequently.

## FEATURES
