

The background is a vibrant blue sky filled with white, fluffy clouds. A bright sunburst or explosion of light rays emanates from the top center, creating a sense of intense heat and energy. The rays are white and yellow, contrasting sharply with the blue sky.

ARCTIC BLAST™

**ICE
MELTER**
with **CMA**

Fast-Action

Arctic Blast™ is combined with the most effective deicing blends to create the desired reaction to initiate deicing melt down. Arctic Blast™ breaks the bond between the ice and the surface area. As Arctic Blast™ goes to work; its time-release formula stays on the surface area longer, helping to control the freeze/thaw cycle.

Health & Safety

Arctic Blast™ is safer to handle without protective clothing. It does not dry out or irritate the skin.

Non-Tracking

When used properly, Arctic Blast™ will remain where applied and will not cause any unsightly tracking or residue problems.

Easily Dispersed & Extended Shelf Life

Arctic Blast™ is specially formulated with an anti-caking agent to remain free-flowing for easy dispersion.

Visually Measured

You will see the quick action of Arctic Blast™ going to work on the ice and snow right away. This product is specially coated with a "BLUE" color indicator which allows for precise spreading to ensure cost-effective dispersion.

Helps Enhance Soil

Arctic Blast™ works to preserve soil supporting compounds when compared to the leading ice melt brands. With Arctic Blast™, there is no tracking or slimy residue; making clean up virtually non-existent.

Traction Control

Arctic Blast™ goes after the ice and snow clearing the way to safety. This specially formulated product provides added traction control; further enhancing performance.

Corrosion Protection

Specially enhanced with CMA (Calcium Magnesium Acetate), our formula guards against concrete and corrosion damage by forming a protective coating on the surface.
